

## MICROSOFT COMMERCE SERVER 2002

### What is Commerce Server?

Commerce Server 2002 is an integrated server software platform for rapidly building next-generation online businesses. Built on agile Microsoft .NET technology, Commerce Server 2002 can extend your site's functionality, drive profitability, and enhance the user experience globally. Commerce Server 2002 provides powerful features for user profiling, personalization, catalog management, order processing, globalization, and advanced online business analytics.

Commerce Server 2002 provides everything you need to engage and manage a global network of customers and trading partners, conduct business in multiple languages and currencies, and empower business users to make smarter business decisions while maximizing the effectiveness of your online business.

Commerce Server 2002 builds on six years of experience delivering the scalable, high-performance, mission critical solutions enterprise customers need. Numerous reliable online business solutions have been delivered with powerful, easy to use management tools that minimize maintenance time and total cost of ownership.

### Who Uses Commerce Server?

Commerce Server 2002 is considered "enterprise-class" software, appropriate for the e-business needs of medium to large sized companies. Here is a brief list of recognizable enterprises that depend on Commerce Server:

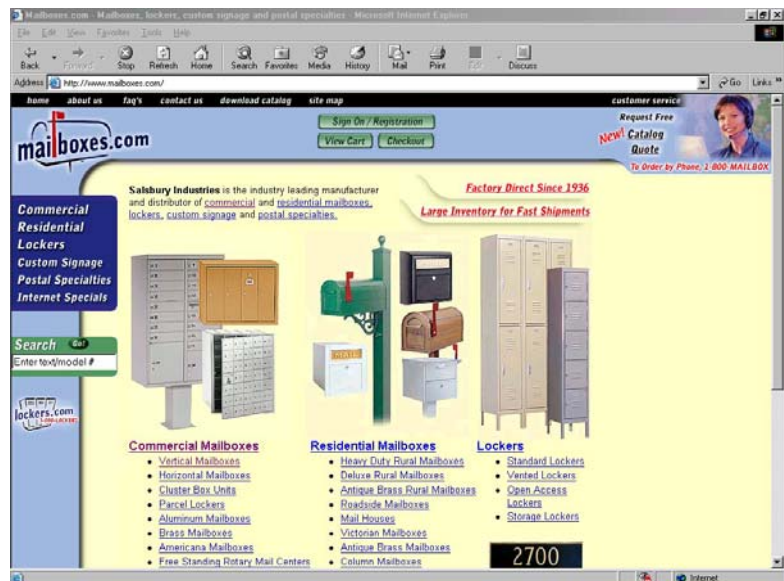

- Starbucks Coffee Company ([www.starbucks.com](http://www.starbucks.com))
- Dell Computer Corp. ([www.dell.com](http://www.dell.com))
- RadioShack Corp. ([www.radioshack.com](http://www.radioshack.com))

## Scalable Commerce Server Architecture

## Comments From AMULET Clients

AMULET prides itself on long-term client relationships. In many cases, we design and build the complete e-commerce solution, and continue on to provide managed application services. Here are recent comments from two satisfied customers:

*"We needed to complement our traditional catalog sales for our residential and commercial mailbox product line with a scalable e-commerce solution. We've been very pleased with our selection of Microsoft Commerce Server, and specifically AMULET's ability to develop many custom features within this environment. The AMULET engineering team proved to be real pros. Highly recommended."*

**Michael Lobasso, CFO, Salsbury Industries**

*"Spectrum Chemical and our sister company Spectrum Pharmacy Products required a significant e-commerce site to represent our position in the industry. Commerce Server has proven very capable in supporting our online business operation and the technology has been very stable. AMULET Development provided excellent custom development services to make Commerce Server shine. We're very pleased with the end result."*

**Roy Sweet, VP Sales, Spectrum Chemical**

## Who is AMULET?

AMULET Development Corp. is a Web database and e-commerce integration firm founded in 1995 to provide quality technology solutions for businesses in a broad range of industries. Specializing in Microsoft server, Web, and database technologies, we've built many high profile e-business websites.
